

Dr. Lawrence Kotlow Presents: Pediatric Dentistry-Treating Tethered Oral Tissues (TOTS)

Since 1974, Dr. Lawrence Kotlow has been surgically correcting infants, toddlers and teenagers who present with oral problems related to tethered oral tissues. He is a standard laser course provider for the Academy of Laser Dentistry, achieving mastership at the academy. Dr. Kotlow has used erbium, diode, Nd:YAG and now the first hard and soft tissue laser CO₂, Solea to correct many soft and hard tissue problems seen in children from birth through teen aged years. Dr. Kotlow is an international speaker and a contributing author to four pediatric laser textbooks in addition to recently publishing his first book "SOS 4 TOTS".

SOLEA

This course is specifically created for pediatric dentists, general dentists, as well as pediatric medical providers who are interested in understanding, diagnosing and being a part of the breastfeeding team.

Learning objectives for this course:

- Identifying and diagnosing lingual, buccal and maxillary and mandibular lip-ties in infants and children in addition to other soft tissue surgical procedures needed by these age groups
- Myths about surgical care and treatment of TOTS
- Easily integrating into the breastfeeding team
- Choosing the right laser in the release or revisions of TOTS
- Post-surgery care for the surgical area and patient
- How to successfully incorporate infant laser surgery into your practice
- How to successfully market yourself as a laser dentist treating TOTS

Learn why treating TOTS is not just for Breastfeeding

Convergent Dental, Inc. is designated as an Approved PACE Program Provider by the Academy of General Dentistry. The formal continuing education programs of this program provider are accepted by the AGD for Fellowship/Mastership and membership maintenance credit. Approval does not imply acceptance by a state or provincial board of dentistry or AGD endorsement. The current term of approved extends from 11/1/2017 – 12/31/2019. Provider ID# 364751.
